

Omar Khaled El-Khouly

Software Developer

6th of October, Giza | khaledelkhly57@gmail.com | +20 112 302 9406 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Software Engineering student (Year 3) specializing in high-performance web applications and intelligent systems. Proficient in React, Next.js, and TypeScript. Strong interest in Artificial Intelligence, Deep Learning, and Computer Vision. Experienced in bilingual (Arabic/English) systems, RTL/LTR layouts, and clean scalable architectures.

EDUCATION

October Technological University

Faculty of Technology of Industry & Energy — IT Major (Software Engineering)

Third Year · Expected Graduation 2026/2027

ACHIEVEMENTS

4th Place in Africa — ATC Mobile Application Development Competition

African Talent Competition (ATC) | July 28, 2025 – August 27, 2025

- Ranked 4th out of competing teams across the entire African continent in mobile application development
- Completed an intensive training and evaluation program throughout the competition period

INTERSHIP EXPERIENCE

ICT Intern — Afro Academy

February 20, 2024 – May 8, 2024

- Applied modern frontend development practices including component-driven architecture and responsive design
- Built and optimized responsive UI components, improving application performance and cross-device compatibility

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Vite, Framer Motion

Backend & Tools: Node.js, REST APIs, PostgreSQL, Git, Vue.js, Django, Rust, Tauri v2

AI / ML: Ollama, Moondream, Llama3, Deep Learning, Computer Vision

Languages: Arabic (Native), English (C2 Proficient)

PROJECTS

Zenith — System Health Monitor

Stack: Tauri v2, React, Rust, Windows 11

- High-performance glassmorphic desktop system monitor built with Tauri v2, React, and a Rust backend

- Real-time CPU thermal intelligence with core delta analysis, hardware health warnings, and sub-1% CPU overhead
- Dual precision gauges (CPU usage + temperature), multi-core monitoring grid, live RAM and disk tracking

StoryBox — Local AI Photo Storyteller

Stack: Ollama, Moondream, Llama3, Python

- Fully local AI-powered storytelling app that analyzes photos using Ollama, Moondream, and Llama3
- Generates automated stories every 12 hours from indexed local images — no cloud uploads, strong privacy focus
- Background intelligent folder indexing, smart cleanup cycle, and pin/favorite story management system

Hodor — RFID/QR Attendance System (Devora Project)

Stack: React, Framer Motion, TypeScript, RFID, QR

- Premium bilingual (Arabic/English, RTL/LTR) attendance management interface with glassmorphic dark/light UI
- QR-based student self-editing system, dynamic admin dashboard, and RFID hardware integration
- Lecture lifecycle management with real-time attendance tracking and Framer Motion transitions

QueueLess — Multi-language Queue System

Stack: Next.js, React, TypeScript, PostgreSQL, WebSockets

- Real-time queue and turn-tracking system with live WebSocket updates and multi-language support

Octa Remake — University Portal

Stack: Next.js, React

- Bilingual (Arabic/English) student project showcase portal with RTL/LTR support built with Next.js and React

CERTIFICATIONS & COURSES

- **AI** — ITI — Information Technology Institute, July 2024
- **Applied Deep Learning** — ITI — Information Technology Institute
- **Computer Vision** — Kaggle
- **Intro to Deep Learning** — Kaggle
- **Python** — Cisco Networking Academy
- **Data Science** — Cisco Networking Academy
